generation*
Automated GUI Tests

BREDEX
Software-Entwicklung und Beratung

GUIdancer®

Step into
a new testing
generation

Benefits

- **Reduced cost of automated GUI testing**

- **Supports agile GUI testing**

- **Platform independent tests**

- **Continuous testing**
  Stable regression tests
  Integration tests in sync with development

- **Less than 10% of project effort for automated testing**

- **Exponential test growth**

- **No division between specification and automation**
  Directly executable specifications

- **Multilingual testing**

- **Extensible**

GUIdancer *Test Automation*

Time

Iteration / Sprint

Implementation

**Test specification
and maintenance**

**Automatically
executed tests**

Key features

- **Eclipse-based**
  Runs as standalone application or Eclipse plugin

- **Keyword-driven testing**
  Code-free test automation
  Tests easy to create from reusable keywords

- **Independence from application**
  No application needed to start test creation
  Test automation runs parallel to software implementation
  Runnable tests as soon as application available

- **Powerful test automation**
  Robust object recognition
  Flexible tests easy to adapt and maintain
  Separation of data/implementation details from test flow
